

**FLOODS SEMINAR (GEO 6348), TUR 3012**  
**T | Period 6 - 7 (12:50 PM - 2:45 PM)**  
**R | Period 6 (12:50 PM - 1:40 PM)**

**FALL 2018**

**Instructor:** Dr. Joann Mossa  
**Office Location:** 3129 Turlington

**Phone:** 352-294-7510 or 392-0494  
**Office Hours:** TR 11:30-12:30 or by apt.

**E-mail:** [mossa@ufl.edu](mailto:mossa@ufl.edu) (please communicate when appropriate)

**CATALOG DESCRIPTION:** Examines the world's most extreme floods from the Pleistocene through present due to various causes. Discusses physical and human aspects of flood warning, preparedness, response and recovery throughout the world.

**COURSE OBJECTIVES INCLUDE:**

- *Understanding of the causes of floods* including excessive precipitation, excessive snowmelt, climatic oscillations, tsunamis, coastal storm surges, glacial lake outburst floods (GLOFs), ice jams, landslides, natural dam failures and other physical processes. Floods are also caused or augmented by failures, overtopping, mismanagement or intentional destruction of constructed dams and artificial levees and floodwalls.
- *Examining methods for assessing paleofloods*, paleoclimate and historical change with PSI-SWD- (paleostage indicators slack water deposits) and varied geologic and chronologic techniques (radiocarbon dating, tephrochronology, dendrochronology, lichenometry, stratigraphic methods), remote sensing for interpreting landscapes and change; Use of GIS and GPS for flood response, recovery and mitigation including search and rescue, flood frequency analysis, hydrologic modeling, and floodplain mapping
- Knowing that *values, attitudes and norms of different cultures and nationalities affect flood decisions and responses*. Extreme floods are influenced by settlement choices, land use change, governmental behaviors, and public education about disasters. *Individuals of different nationality, age, culture, gender, race, and income may be disproportionately and differentially affected by floods* in terms of lives, homelessness, displacement, and property damage due to variations in vulnerability and resilience in differing parts of the world.
- *Examining problems beyond direct inundation* including the erosion done by water, the debris brought in by water, ensuing famines, the spread of disease due to poor drinking water, disrupted sanitation facilities, inadequate and dysfunctional medical care, contamination of water (sewage, dam failures at mines), etc.
- *Considering varied outcomes of floods and lessons learned*. Discussing how floods have influenced history, culture, art, music, historic preservation, race relations, migration patterns, crime and crime-control attempts, mental health, seismology, animals, agriculture, livelihoods, engineering, policy, relief efforts, fund raising, tourism and more. Some stories regarding public education, advertising, memorializing, policy, government conflicts, and engineering.

**DISCLAIMER/WARNING**

Please use your judgment as to whether the content of this course is suitable given your history and background, especially if you have experienced trauma or distress due to a disaster. We view some documentaries and witness accounts of recent floods that are sad and/or disturbing.

## GRADING SCALE

A = 92 or above; A- = 90-91.9; B+ = 88-89.9; B = 82-87.9; B- = 80-81.9; C+ = 78-79.9; C = 70-77.9; C- = 68-69.9; D+ = 66-67.9; D = 60-65.9; D- = 58-59.9; E = < 58

<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

## NO CLASSES:

Thanksgiving Week– Tuesday November 20<sup>th</sup> and Thursday, November 22<sup>nd</sup>

Other cancellations may be announced in class

## BASIC TEACHING APPROACH

- Some readings, posted on Canvas (no \$ out of pocket for books)
- Want to create a positive learning environment
- Content and teaching style appeals most to visual and kinesthetic/experiential learners
- Big believer in resource availability, all Power Points posted on Canvas; Use them
- I ask open questions in class to help in retention, learning and thinking
- Bring your questions to assist in understanding and recollection
- Attendance, responsible behavior and engagement encouraged by in-class work
- Some in-class discussion after shorter videos
- Some Canvas discussion, posting, thinking
- Many items graded (more than 15). You will not be anonymous.
- *If you tend to miss classes, want to be anonymous, or prefer exams to assignments, consider dropping this class in favor of one more suited to your learning style*

## ASSIGNMENTS, ATTENDANCE AND MAKE-UP POLICY

Class attendance is required, with exceptions given in the university policy on attendance.

<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>

### Grade Breakdown Summary

Assignment Type	Points or percentage
<i>Mini-assignments</i> <i>In class: Video sheets, 1 pt.</i> <i>Take-home: crossword puzzles, discussion comments in Canvas, 1-3pts.</i> <i>Longer take-home: 3-5 pts</i>	40%
Exam 1	20% (40 questions, MC)
Exam 2	20% (40 questions, MC)
<i>Flood research paper</i>	20%
<i>Total</i>	100%

## MINI (MOSTLY IN-CLASS) ASSIGNMENTS

One type of in-class assignment will be answering questions about documentaries or videos of floods associated with a variety of causes. Soon after class begins, the door will be closed as to not have distractions during the movie, so it is important to be on time. These answer sheets will be turned in at the end of class (*worth 1-3 pts. each, will be specified*). After they are returned, keep these to help with your exam review. Remaining assignments will include participation in Canvas discussions and in-class

small group work, and short take-home assignments designed to assist in learning terminology, thinking skills, concepts and questioning (35 pts.)

### **BACKGROUND AND PLEISTOCENE EXAM**

The exam will consist of multiple choice questions. A review will be held the class before with some sample questions. It will be given after these units are completed, 40 question multiple choice (20 pts.) Tentatively review on October 2 and Exam on October 4<sup>th</sup>.

**TOPICAL FLOOD RESEARCH:** Discuss interests with me before beginning. Relate Extreme Floods to something of a topical nature such as: Art Inspired from Extreme Floods, Calculating Economic Costs of Extreme Floods, Pets and Extreme floods, The Elderly and Floods, Disease and Extreme Floods, Gender and Extreme Floods, Mental Health and Extreme Floods, Hospitals and Extreme Floods, Schools and Extreme Floods, Engineering for Extreme Floods, Climate Change and Extreme floods, Children and Extreme Floods, Water Contamination and Extreme Floods, Fires and Floods: How are they connected?, Recovery from Extreme Floods, Homelessness and Extreme Floods, Humanitarian Assistance and Extreme Floods, Housing and Extreme Floods, Vegetation Changes from Extreme Floods, Construction and Extreme Floods, Planning and Extreme Floods, Music Inspired from Extreme Floods, Ancient Civilizations and Extreme Floods, Race and Extreme Floods, Poverty and Extreme Floods, Dysfunctional Governments and Extreme Floods, Geomorphology and Extreme Floods, Livestock and Extreme Floods, Cropland and Extreme Floods, Donations and Extreme Floods, Migration following Extreme Floods, Memorializing Victims of Extreme Floods, Mapping of Extreme Floods, Boats and Extreme Floods, etc. (see me if considering another potential topic) Draw from multiple events, and include at examples from outside the U.S. Submit 10-12 page double-spaced paper with at least 10 references from **refereed journals** (discussed in class). Maps and graphics are a part of the grade but are not included in the page length. The grading rubric is as follows: 10% originality (look at examples and topics discussed outside of class, 20% breadth and depth of research (do not focus on one flood, compare your topic across different events and locations), 20% organization and structure including use of subheadings, 20% writing quality and grammar, 10% use of maps, data, tables and graphics, 20% quality and quantity of references and citations. Due early December (20 pts.)

### **EXAM 2: MODERN FLOODS**

Late November. A fun review will be held the class before (tentatively November 27) with some sample questions. Not comprehensive, 40 question multiple choice (20 pts.), tentatively November 29. We still have a wrap-up class on December 4

### **GENERAL OUTLINE: COURSE TOPICS**

#### **Weeks 1, 2 and 3: Background and Overview**

- Introduction to Class and Class Environment
- Physical Causes of Floods:
  - What is a flood? How are they measured?
  - What are some important floods in the geologic past and their effects?
  - How do we know about their magnitude, causes and dates?
  - What are the physical causes of extreme floods?
- Floods and Society:
  - Who is most affected by extreme floods? How do humans affect floods?
  - What are some important historical floods and their impacts?
  - How can humans best manage floods and other disasters?

- Discovery Channel Flood **movie** (global coverage)
- What is your flood zone? And Floods and Society Discussions

### **Readings that Provide Background on Floods**

O'Connor, Jim E. and John E. Costa, 2004, *The World's Largest Floods, Past and Present: Their Causes and Magnitudes*, U.S. Department of the Interior, U.S. Geological Survey Circular 1254 (pdf file on Canvas)

O'Connor, Jim E. and John E. Costa, 2003, *Large Floods in the United States: Where They Happen and Why.*, U.S. Department of the Interior, U.S. Geological Survey Circular 1245  
<http://pubs.usgs.gov/circ/2003/circ1245/pdf/circ1245.pdf> (pdf file on Canvas).

### **Weekly topics...may change slightly or be reduced**

#### **Weeks 3, 4 and 5: Some Pleistocene Megafloods**

- Discussion of the Pleistocene and climate change
- Glacial Lake Missoula; dry falls, megaripples: **Mystery of Megaflood movie**
- Lake Bonneville and its lake basin overflow floods
- Megafloods making island Britain through the English channel

### **Readings about Pleistocene Floods**

Baker, V.R. 2002. *The Study of Superfloods: Science*, Vol 295 2379-2380.

Costa, J.E. and R. L. Schuster, 1988, *The formation and failure of natural dams: Geological Society of America Bulletin*, v. 100: 1054-1068.

Gupta, S., Collier, J.S., Palmer-Felgate, A. and Potter, G., 2007, *Catastrophic flooding origin of shelf valley systems in the English Channel*, *Nature*, v. 448: 342-346.

O'Connor, J.E., and Baker, V.R., 1992, *Magnitudes and implications of peak discharges from glacial Lake Missoula: Geological Society of America Bulletin*, v. 104, p. 267-279.

Saint-Laurent, D., 2004, *Palaeoflood hydrology: an emerging science Progress in Physical Geography* 2004; 28; 531-542.

### **Review and Exam 1: Overview, and Pleistocene floods**

Target Date : early October

#### **Weeks 6 and 7: Some Megafloods of the Holocene to the Modern (1800 A.D.)**

- Aniakchak, Alaska caldera breach 3500 BP (appx. 2000 BC)
- Repeat floods in the Netherlands dating back more than 2 millenia
- Columbia River Landslide dam failure, circa 1450 AD or 1700 AD?
- Possibly linked to 1700 tsunami Japan
- 1755 - Lisbon, Portugal tsunami (earthquake & fires, too), birth of seismology compared to Japan 2011 tsunami & nuclear disaster

## Readings about Holocene to Modern (pre-1800) floods

Atwater, B.F., Musumi-Rokkaku, S., Satake, K., Tsuji, Y., Ueda, K., and Yamaguchi, D.K., 2005, The Orphan Tsunami of 1700: Japanese Clues to a Parent Earthquake in North America, U.S. G. S. Professional Paper 1707, 133 pp. <http://pubs.usgs.gov/pp/pp1707/pp1707.pdf>

Waythomas, C.F., Walder, J.S., McGimsey, R.G., and Neal, C.A., 1996, A catastrophic flood caused by drainage of a caldera lake at Aniakchak Volcano, Alaska, and implications of volcanic hazards assessment: Geological Society of America Bulletin, v. 108, no. 7, p. 861-871.

## Weeks 8, 9 and 10: Modern Megafloods of Marine, Lacustrine or Mixed Origin

- Vulnerable places with multiple flood drivers
  - Venice, Italy: a sinking city with sea level rise, Venice **movie**
  - New Orleans: the soup-bowl, Hurricane Katrina 2005 and NOVA **movie**
  - Bangladesh a country of poverty, bank erosion, and floods
  - Contrast of vulnerable nations across the world and the role of social factors
- Tsunamis, Coastal Storm Surges, and Lowland Lake Floods
  - Galveston 1900, bad forecasting, changed fate of Texas towns
  - The Okeechobee Florida Hurricane of 1928, race & memorials
  - The Great Hurricane of 1938, NE U.S., American Experience **movie**
  - North Sea, Europe 1953 winter storm flood
  - Lituya Bay, Alaska megatsunami, 1958: a > 500m landslide splash
  - Indian Ocean 2004 tsunami and NOVA **movie**: A worldwide killer

## Weeks 11, 12 and 13: Some Modern Megafloods along Rivers

- Big Rivers-Big Floods
  - Mississippi Flood of 1927: mass migration, Frontline **movie**
  - Yellow River (*Huang He*) floods: Lindbergh & 1-4 million dead
  - Yangtze River floods in 1998 and more: 14 million homeless
  - Comparing how differing nations plan for and respond to floods on big rivers: issues include global inequality, illiteracy, cultural adaptation, governmental suppression, land availability, disease and more
- Catastrophic Dam Failures/Overtopping/Mismanagement
  - Johnstown Flood 1889, the Red Cross effort and Johnston flood
  - Malpasset France in 1959, arch dam safety, disaster tourism **movie**
  - Vaiont disaster, Italy 1963, landslide overtopping-know geology **video**
  - Florence, 1966; Flooded works=mud angels and historic preservation
  - An international view of dam failures, varied local reactions and global effects
- Catastrophic Levee and Floodwall Failures
  - Red River (ND, MN, Canada) flood from snowmelt, 1997 and more
- Intentional Floods
  - Blowing up dams and dikes in wartime (By allied forces in Germany, by Germans in Netherlands, by Chinese in China)
  - Dynamiting levees: flooding rural areas to save cities (China, U.S)
  - Dam-building/flooding >1 million people, Yangtze-Three Gorges, 2000-
  - Comparing perspectives of differing nations on intentional floods, especially those associated with dam building and forced displacement of its citizens

#### **Week 14: “What If” Floods: Might Have Been/Might Become**

- Might Have Been a Megaflood
  - Mississippi-Atchafalaya 1973 (McPhee.The Control of Nature)
  - China and averting floods from earthquake landslide lakes 2008
- Might Become a Megaflood
  - Usoi Dam/Sarez Lake, Murghab River, Tajikistan, 1911 and holding
  - Three Gorges dam (Yangtze, China) landslides and seismic activity
- Comparing how different nations and cultures are (not) preparing for what-if floods

#### **Reviewing and Exam 2**

Target Date: Thursday, November 29

#### **Week 15: Speculation, The Future of Flooding**

- Flood warning and preparedness: How has it changed and can it be improved?
- Flood response and recovery: How has it changed and can it be improved?
- Flood insurance/FEMA: **videos**
- Floodplain management: Where are we and others?
- Floods: climate change, sea level rise, land use change and settlement trends

#### **Readings Regarding Flood Management**

Gilbert F. White National Flood Policy Forum, *2004 Assembly, 2004*, Reducing Flood Losses: Is the 1% Chance (100-year) Flood Standard Sufficient?, National Academies Keck Center, Washington D.C., Sept. 21-22, 2004, <http://www.nlic.org/downloads/GilbertWhiteForum.pdf>

#### **Topical Flood Research Paper Due Early December**

#### **ATTENDANCE POLICIES**

Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found at:

<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>

**HONOR CODE:** UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code.” On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code (<http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor of this class.

**STUDENTS WITH DISABILITIES AND OTHER CONCERNS**

"Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation. Please be aware that the University Counseling Center (392-1575, <http://www.counseling.ufl.edu/cwc/Default.aspx>), the Student Health Care Center (392-1161) and Student Mental Health (392-1171) can assist students as they work through personal, academic and social issues. Please take care of your health. Provide advance notice and obtain documentation for excused absences where possible. If needed, University Police Department can be contacted at 392-1111 or Dial 9-1-1 for emergencies. Please minimize distractions to yourself and others during class time (cell phones off, no ancillary conversations, quiet typing only).

**EVALUATIONS:** Students are expected to provide feedback on the quality of instruction in this course based on 10 criteria. These evaluations are conducted online at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results>
