NO CLASSES: Friday, November 6: Homecoming; Friday November 26: Thanksgiving break
INDIVIDUAL COURSE ASSIGNMENTS (Resume and two of remaining projects)

Effective Resume and Self-Evaluation. Include some background personal information, career objectives, education, work experience, special skills, leadership/service and contact information for references. Seek a good source to assist you, such as a book (Job Hunting for Dummies, a Resume Book, or a web site about resumes. If you lack experience in the field or obvious marketable skills, write a critique of your weaknesses and how you plan to improve these or would discuss these in an interview.

Graduate School: Perception vs. Reality. Part 1: Your thoughts and perceptions on what graduate school in Geography would be like and how you might fit in that world; Part 2: Interview a minimum of 2 current or former graduate students about their graduate study experience (in Geography or a related area). Quote them and discuss how your original thoughts and awareness have changed during the course of the interviews. Give names and background on how you connected with them. These are supposed to be different from class panelists. Ask them what they like best and least about graduate school, what advice they have for a person considering graduate study. Include background on how you know them, what other questions you asked, and adequate specificity to give the assignment credibility.

Applying to Graduate School. Get information and an application from one University that is a good fit for your interests in Geography (see www.aag.org web site). Include for EACH school: 1) a half-page explanation of why and how you came to choose this institution; 2) the application; 3) a letter of intent; and 4) names of individuals you would ask for letters of recommendation and why you are selecting these individuals. Appropriate content for the letter of intent can be found at our class website in the Power Point presentation. Your letters will likely be similar for the different institutions, but should reflect your research of faculty specializations at that institution and how they fit your academic interests.

Your Experience at Career Fair or Showcase: A short (2-3 pp.) write-up on your preparation of employers you planned to talk with, what you wore, one minute infomercial about yourself, your visit, which employers you met, which were the most promising, your follow up, etc.

The Work World: Perception vs. Reality. Part 1: Your thoughts and perceptions on what working in Geography would be like and how you might fit in that world. Some domains in the work world include planning, environmental consulting, mapping, military careers, K-12 teaching, Peace Corps service, university professor, etc. Part 2: Interview and quote a minimum of 2 current/former employees in this area about their work experience and discuss how your original thoughts about this work have changed during the course of the interviews. Ask them what they like best and least about their work, what advice they have for a person considering this career. Include background on how you know them, what other questions you asked, and adequate specificity to give the assignment credibility.

Interview Preparation: Compile a list from varied sources of 10 questions frequently asked at interviews and write an individual response for each of those questions. Where possible, draw from your academic background and career experiences. Cite your sources for the questions. Included should be an answer to: Tell me about yourself? and What questions do you have for us?

Complete the Application Process for 2 Jobs that interest you. The employers should be a good fit for your interests and background. Include a half-page explanation of why and how you came to choose these places and what you have learned about them. For each, attach a cover letter introducing yourself and why you think that you are a worthy applicant. Seek a good source to assist you, such as a book (Job Hunting for Dummies or a web site about letters of application. If you are looking for a job in cartography or GIS, include a small portfolio showing samples of your work. Discuss how your class projects/academic background connect with the skills and knowledge required in the job.

Work World-Regional Job Sources: Develop a descriptive list of job sources in a region (e.g. southeast Florida). List employer information (company name, size, type of business, types of positions available, contact information of human resource personnel) for several companies/agencies
that employ geographers. Restrict your list to those you qualify for now, or sort them for those you qualify for now with a few examples of those you might qualify for in 5 years or so. Organize appropriately. At least 8-10 employers should be listed.

**Work-World-Business Plan:** Some of our majors have started their own business (travel agencies, leading adventure tours, consulting firms, wine shops, bike shops, etc.) Develop a business plan according to standard procedures. Sections might include: Executive Summary, Vision and Mission, Present Situation, Goals, Objectives, Company Overview, Legal Business Description, Management Team, Board of Directors, Strategic Alliances, Product Strategy, Current Product, Research and Development, Production and Delivery, Market Analysis, Market Definition, Customer Profile, Competition, Risk, Marketing Plan, Sales Strategy, Distribution Channels, Advertising and Promotion, Public Relations, Financial Plan, Assumptions, Financial Statements, Capital Requirements, Conclusion

**Book review: Interviewing/job hunting/professional development/Geographic careers:**
Read and review a book that concerns either interviewing, job hunting, professional development or geographic careers written in the past 10 years (earlier books may be individually approved with instructor’s permission). I have books that you can borrow, but am also willing to consider a variety of relevant options. Consult instructor if you are uncertain whether your book is appropriate. Summarize the book, including the important take-home messages, and describe what was especially meaningful or helpful to you and whether you think it would be helpful to others. Also, critique and discuss any problems and if/how this book did not meet your expectations.

**Interview Preparation:** Compile a list from varied sources of 10 questions frequently asked at interviews and write an individual response for each of those questions. Where possible, draw from your academic background and career experiences. Cite your sources for the questions. Included should be an answer to: Tell me about yourself?; and What Questions do you have for us?

**Alternative project:** Other project relevant to careers in geography (instructor’s approval required).
