

GIS 4113/6104: Spatial Networks
Department of Geography

SYLLABUS: Fall 2020

Instructor E-Mail Lab Website

Office Hours and Location

**Class Meeting Time and Location** 

Dr. Yujie Hu yujiehu@ufl.edu

https://geonavilab.geog.ufl.edu

Wed. 1:00 pm – 1:55 pm; Fri. 3:00 – 4:00 pm

(or by appointment); via Zoom Fri. 9:35 am – 12:35 pm; via Zoom

#### **COURSE DESCRIPTION**

It is often the case that real-world systems can be represented as networks of many interacting components. Examples include information (the World Wide Web, citation), social (friendship, classmates), physical (transportation, distribution), biological (food chain, brain) systems, and so forth. Many of these networks are essentially spatial, meaning each vertex can be associated with a location somewhere in the real world. Based on recent advances in network science and GIScience, this course teaches the fundamental concepts, models, and techniques for describing, visualizing, measuring, and analyzing networks. It also introduces their applications in geography, transportation, social science, etc. A series of labs using the popular network analysis package Gephi and GIS software ArcGIS are also designed to help students gain hands-on experience in visualizing and analyzing networks.

# COURSE OBJECTIVES

After successful completion of this course students should be able to:

- Have a solid grasp of the vocabulary, central concepts, measures and techniques relating to networks;
- Conduct experiments within the Gephi and ArcGIS software environment;
- Apply their knowledge to visualize and analyze a real network data set of their choosing.

## PREREQUISITES

Entry level knowledge of statistics (STA2023, GEO3162C/6160, or equivalent), or the consent of the instructor. Prior knowledge or experience with ArcGIS is preferred, but not required.

#### **TEXTBOOKS**

Recommended textbooks:

Newman, M. (2010). Networks: An Introduction. Oxford University Press.

• Scott, J. (2017). *Social Network Analysis* (4<sup>th</sup> ed.). <u>SAGE Publications</u>.

#### EVALUATION

### **GRADE DISTRIBUTION**

### For GIS 4113:

# • In-class quizzes (2 points each – 10%)

<u>Five</u> short quizzes will be administered throughout the course, in class. These may be in a form of multiple choice, short answer, or short essay responses. Each quiz is worth 2 points—1 point for participation and 1 point for the question itself.

# • Assignments (100 points each - 40%)

<u>Seven</u> homework assignments and <u>seven</u> lab exercises will be given to help students understand the concepts and methods discussed in class. You have one week to complete each assignment.

# • Mid-term exam (100 points – 20%)

A close-book exam, covering all course contents by the day of the test, will be administered in class. The exam will comprise a mix of short answer, short essay responses, and math problems. Bring a calculator.

# Final individual project (100 points – 15%)

Each student will select a topic (must be approved by instructor) and complete an independent project utilizing important skills you have acquired from the class. Each student needs to submit a report. Length is 3000 – 4000 words and must have proper references (a suggested format of the report will be provided). We will approach this in stages. The stages of report development will be graded and returned to the student to ensure progress: outline with details about data and methods – 5%, final report – 10%.

# • Final project presentation (100 points - 15%)

Each student will prepare a 15-minute presentation (10-minute for presentation and 5-minute for Q&A) discussing his/her final project. Students will be provided with a rubric to guide their presentation. This usually takes place in the last two weeks of the class.

#### For GIS 6104:

### In-class quizzes (2 points each – 5%)

<u>Five</u> short quizzes will be administered throughout the course, in class. These may be in a form of multiple choice, short answer, or short essay responses. Each quiz is worth 2 points—1 point for participation and 1 point for the question itself.

# Assignments (100 points each – 40%)

<u>Seven</u> homework assignments and <u>seven</u> lab exercises (there will be additional questions in these assignments relative to those for GIS 4113) will be given to help students understand the concepts and methods discussed in class. You have one week to complete each assignment.

### • Mid-term exam (100 points – 15%)

A close-book exam, covering all course contents by the day of the test, will be administered in class. The exam will comprise a mix of short answer, short essay

responses, and math problems. Some questions in the exam are different from the exam for GIS 4113. Bring a calculator.

# • Annotated bibliography (100 points - 10%)

Each student will read <u>ten</u> articles of his/her choice and write an annotated bibliography for each article. The ten articles should cover one specific topic of the student's interest in network analysis. The bibliography should briefly describe: 1) the reference of the article, 2) the purpose of the study, 3) the data collection in the study, 4) the methods used for network analysis and/or visualization, and 5) your evaluation of the study. Length is 250 – 300 words for each article. Students may refer to this link (<a href="https://guides.library.cornell.edu/annotatedbibliography">https://guides.library.cornell.edu/annotatedbibliography</a>) for a good sample.

# • Final individual project (100 points - 15%)

Each student will select a topic (must be approved by instructor) and complete an independent project utilizing important skills you have acquired from the class. Each student needs to submit a report. Length is 4000 – 5000 words and must have proper references (a suggested format of the report will be provided). We will approach this in stages. The stages of report development will be graded and returned to the student to ensure progress: outline with details about data and methods – 5%, final report – 10%.

## Final project presentation (100 points – 15%)

Each student will prepare a 15-minute presentation (10-minute for presentation and 5-minute for Q&A) discussing his/her final project. Students will be provided with a rubric to guide their presentation. This usually takes place in the last two weeks of the class.

## GRADING SCALE (&GPA EQUIVALENT)

Α	A-	B+	В	B-	C+	С	C-	D+	D	D-	Е
93+	92-90	89-87	86-83	82-80	79-77	76-73	72-70	69-67	66-63	62-60	59-
4.0	3.67	3.33	3.0	2.67	2.33	2.0	1.67	1.33	1.0	0.67	0

**Note**: A grade of C- is not a qualifying grade for major, minor, Gen Ed, or College Basic distribution credit. For further information on UF's Grading Policy, see: <a href="https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx#hgrades">https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx#hgrades</a>.

#### CLASSROOM POLICIES

- **Attendance & makeup:** Attendance is mandatory for all students. Absences may be excused if they are documentable and the instructor is notified two business days in advance. See the university attendance policies for more detail: <a href="https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/">https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/</a>.
- **Cell phone and texting:** To encourage uninterrupted participation in class, it is expected that students turn cell phones to silent mode before coming to class.
- **Late submissions:** Late submissions of the final project report will not be accepted. Late submissions of assignments (including annotated bibliography) can be accepted, but <u>10%</u> of the points will be deducted per day after the due date.

• **Grade disputes:** Should a student wish to dispute any grade received in this class (other than simple addition errors), the dispute must be in writing and be submitted to the instructor within a week of receiving the grade. The dispute should set out very clearly, the grade that the student believes the assignment should have received as well as why he or she believes that he or she should have received such a grade.

#### OTHER INFORMATION

- Academic honesty: UF students are bound by The Honor Pledge which states, "We, the
  members of the University of Florida community, pledge to hold ourselves and our
  peers to the highest standards of honor and integrity. On all work submitted for credit
  by students at the University of Florida, the following pledge is either required or
  implied: On my honor, I have neither given nor received unauthorized aid in doing this
  assignment." The Honor Code (<a href="http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/">http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/</a>) specifies a number of behaviors that are in violation of this code and the
  possible sanctions. Furthermore, you are obligated to report any condition that
  facilitates academic misconduct to appropriate personnel. If you have any questions or
  concerns, please consult with the instructor or TAs in this class.
- Accommodations for students with disabilities: Students requesting classroom
  accommodation must first register with the Dean of Students Office. The Dean of
  Students Office will provide documentation to the student who must then provide this
  documentation to the Instructor when requesting accommodation. Contact the
  Disability Resources Center (<a href="http://www.dso.ufl.edu/drc/">http://www.dso.ufl.edu/drc/</a>) for information about
  available resources for students with disabilities.
- **Counseling and mental health resources**: Students facing difficulties completing the course or who are in need of counseling or urgent help should contact the on-campus Counseling and Wellness Center (352-392-1575; <a href="http://www.counseling.ufl.edu/cwc/">http://www.counseling.ufl.edu/cwc/</a>).
- Online course evaluation process: Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <a href="https://gatorevals.aa.ufl.edu/students/">https://gatorevals.aa.ufl.edu/students/</a>. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <a href="https://ufl.bluera.com/ufl/">https://ufl.bluera.com/ufl/</a>. Summaries of course evaluation results are available to students at <a href="https://gatorevals.aa.ufl.edu/public-results/">https://gatorevals.aa.ufl.edu/public-results/</a>.
- **COVID-19 Statement**: Our class sessions may be audio-visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate verbally are agreeing to have their voices recorded. If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type

questions and comments live. The chat will not be recorded or shared. As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

## **□** SUGGESTED COURSE SCHEDULE

Students should note that there may be changes to the class schedule.

Weeks	Dates	Lectures	Labs			
1	09/04/20	Course overview; syllabus walkthrough; Intro to spatial networks				
2	09/11/20	Data for networks	Prepare and create networks			
3	09/18/20	Concepts in networks	Prepare and create networks			
4	09/25/20	Concepts in networks	Visualize spatial networks			
5	10/02/20	Concepts in networks	Compute network concepts			
6	10/09/20	Network measures	Create and analyze bipartite networks			
7	10/16/20	Mid-term exam				
8	10/23/20	Network measures	Measure network centrality			
9	10/30/20	Network measures	Measure network distances			
10	11/06/20	Structure of large-scale networks	Prepare for final project			
11	11/13/20	Network models	Prepare for final project			
12	11/20/20	Final project presentation				
13	11/27/20	NO CLASS: Thanksgiving				
14	12/04/20	Final project presentation				
15	12/11/20	1/20 NO CLASS: Reading Day				

### **IMPORTANT DATES TO REMEMBER**

- Mid-term exam: 10/16/2020
- Final project topic: determined by 10/30/2020
- Annotated bibliography (only applies to GIS 6104): submitted by 11/13/2020
- Final project report outline: submitted by 11/06/2020
- Final project report: submitted by 12/15/2020
